

MAIN provides users with advance notice of production software changes. Although our goal is to make the software changes on the planned date, there may be some circumstances due to unforeseen problems, where the software changes may be delayed. If this occurs, the MAIN Help Desk will be notified and the Help Desk message will be updated accordingly.

The following software changes will be in production on May 23, 1996.

RSTARS SCREEN 90 DATE AND STATUS FIELD MODIFICATIONS

Modifications were made to the 90 News/Help Table screen to correctly display the status and all date fields.

RMDS REPORTS AVAILABLE EARLIER

Several performance improvements were made to the Batch Process and Reporting Cycle. Due to the improvements, the RMDS reports should be available earlier in the day than they currently are.

DAFR8200 AND DAFR8240 REPORT MODIFICATIONS

Modifications were made to correct problems with Registers 3 and 5 of the DAFR8200 Daily Transactions Register Report and the DAFR8240 Monthly Budgetary Transactions Register Report. In Register 3, fund and appropriated fund were not printing in the proper fields. In Register 5, transaction codes posting to two general ledger accounts were incorrectly shown as having four general ledger accounts. Both problems have been corrected.
